

Project Design

Team ID	LTVIP2026TMIDS42497
Project Name	Cafeteria Menu Display

Proposed solution :

S. No	Parameters	Description
1.	Problem Statement	The Cafeteria Menu Display Portal is designed to enhance the management, publication, and accessibility of daily and weekly cafeteria menus across an organization. It addresses the need for administrators to create and update menus efficiently while ensuring employees have real-time access to meal options, dietary information, and special offerings.
2.	Solution Description	This solution enables real-time tracking of menu updates and service automation, allowing cafeteria staff to streamline the approval process for new menus and automate scheduling. By centralizing menu management, the platform reduces manual effort, minimizes errors, and improves the overall dining experience for employees.
3.	Uniqueness	The uniqueness of the Cafeteria Menu Display project lies in its integration of automated menu scheduling with a historical record system for future reference. It bridges the gap between administrative backend management and employee frontend accessibility, ensuring transparency in meal planning and dietary options through a single, unified digital portal.
4.	Social Impact	The project creates a positive social impact by promoting workplace health and inclusivity through clear communication of dietary options (such as vegetarian or allergen-free meals). It fosters a better organizational culture by improving employee engagement and ensuring that all staff members, regardless of their dietary needs, have equal and timely information to plan their meals.
5.	Business Model	The business model focuses on enhancing operational efficiency and employee satisfaction through digital transformation. By leveraging the ServiceNow platform, the model delivers a smart, automated solution for cafeteria services that reduces the administrative burden on facility managers and improves the daily user experience for the workforce.
6.	Scalability Of The Solution	Built on a scalable architecture, this portal can easily adapt to the needs of any organization, from a single-site office to a global corporation with multiple cafeterias across different regions.

Milestone-1: Setting up Instance

Purpose :

To create a working environment where the Cafeteria Menu Display system can be developed, implemented, and tested.

Uses :

Enables application development on ServiceNow. Provides a platform to store and manage data. Supports testing and deployment of features.

Steps:

Login to ServiceNow

Navigate to Developer Instance

Request and activate instance

Milestone-2: Application Creation (Studio)

Purpose

Purpose

To build a dedicated application for managing cafeteria menus within ServiceNow.

Uses

Organizes all project components in one place

Enables customization and development

Provides a structured environment for building features

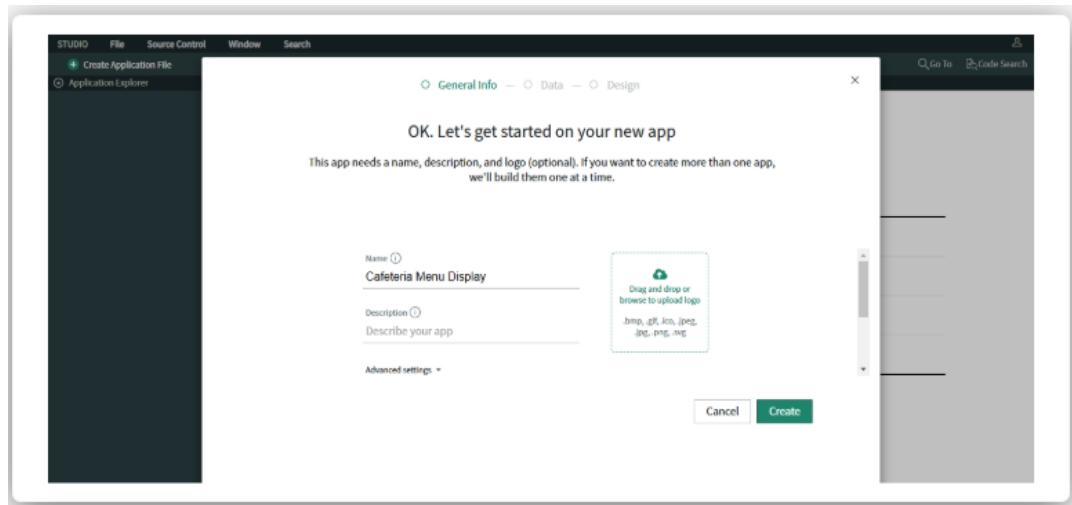

Steps

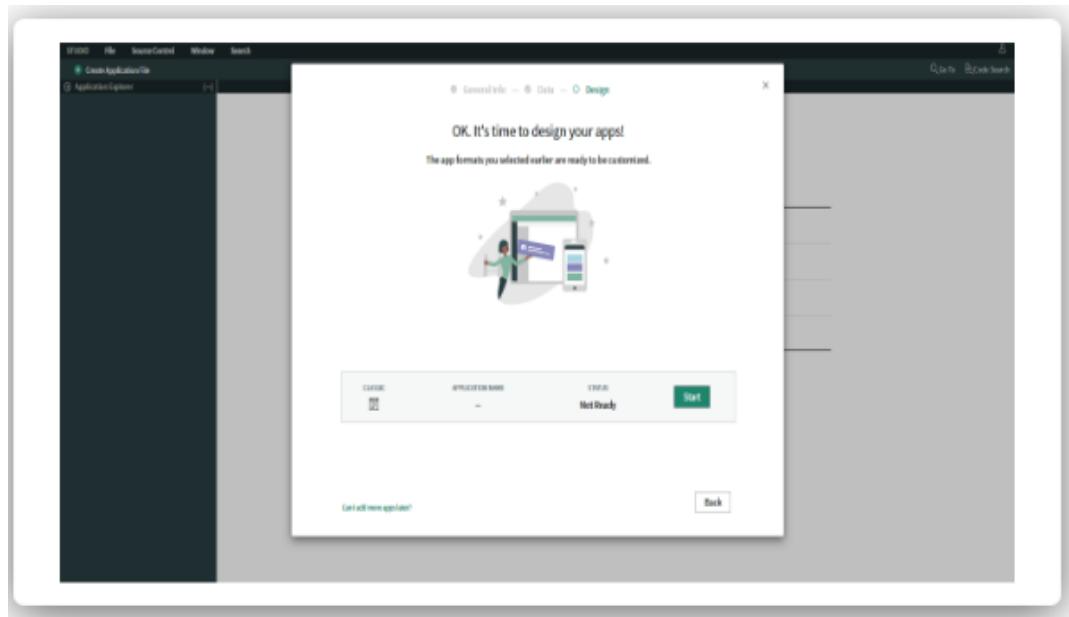

Open Studio

Click Create Application

Name: Cafeteria Menu Display

Click Create → Continue → Start

Milestone-3: Table Creation

Purpose

To store and organize cafeteria menu data in a structured format.

Uses

Stores menu details like name, date, and items. Enables easy data retrieval and updates. Supports reporting and automation processes.

Steps

Table Name

Cafeteria Menu Display

Fields

Menu Name

Menu Date

Menu Items

Status

The screenshot shows the ServiceNow interface for creating a new table named 'Cafeteria Menu'. The 'Label' field is set to 'Cafeteria Menu' and the 'Name' field is set to 'x_5461801_cafeteria_menu'. The 'Application' dropdown is set to 'Cafeteria Menu Display'. The 'Columns' tab displays the following fields:

Column Label	Type	Reference	Max length	Default value	Display
sys_id	Sys ID (GUID)	(empty)	32	false	
Created	Date/Time	(empty)	40	false	
Menu Name	String	(empty)	40	false	
Menu Date	Date	(empty)	40	false	
Updated	Integer	(empty)	40	false	
Status	Choice	(empty)	40	false	3
Updated by	String	(empty)	40	false	
Menu Item	Record Input	(empty)	4,000	false	4
Created by	String	(empty)	40	false	
Updated	Date/Time	(empty)	40	false	

Milestone-4: Service Catalog

Purpose

To allow users or staff to submit new cafeteria menu entries easily.

Uses

Simplifies menu submission process. Provides user-friendly interface. Automates data entry into the system

Steps

Navigate to Service Catalog

Maintain Items → New

Fill details:

Name: Submit New Cafeteria Menu

Category: Cafeteria Services

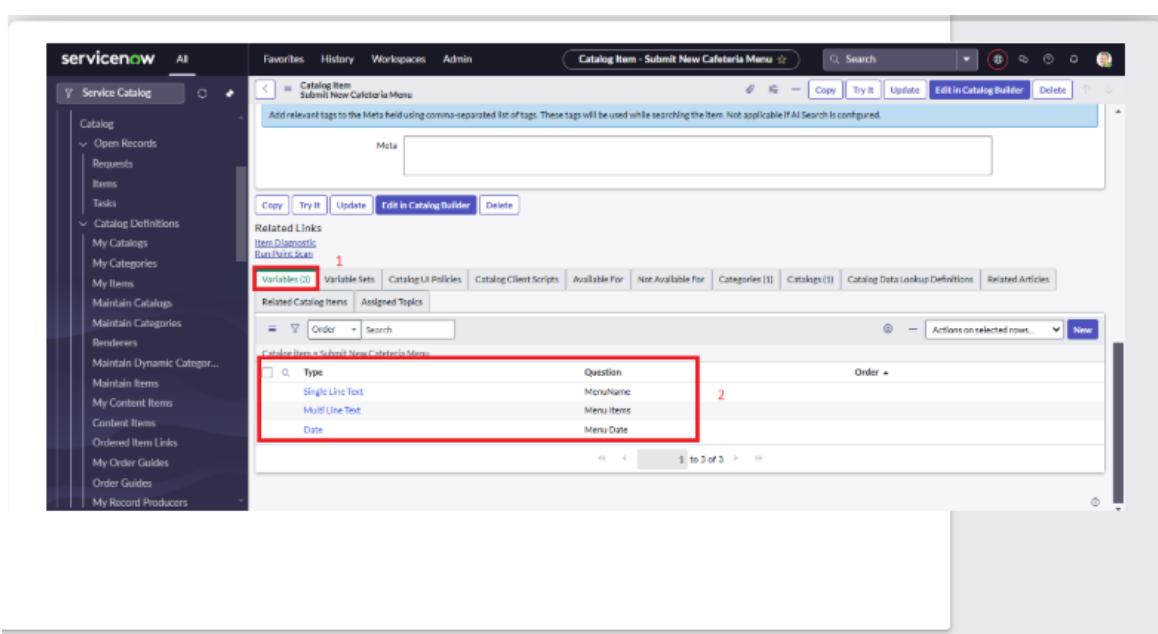

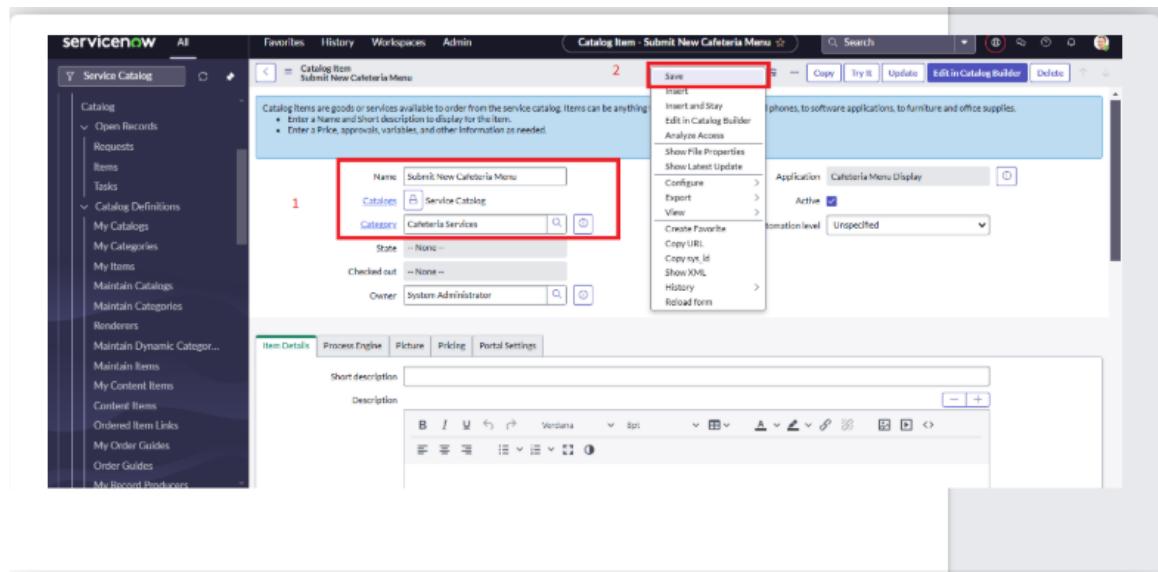

Variables

Menu Name (Single Line Text)

Menu Date (Date)

Menu Items (Multi-line Text)

The screenshot shows the ServiceNow Service Catalog interface. The left sidebar has a red box around 'Catalog Definitions' (step 1). The main area shows a list of catalog items with a red box around the 'New' button in the top right corner (step 4). The list includes items like '3M Privacy Filter - Lenovo X1 Carbon', '3M Privacy Filter - MacBook Pro', 'Microsoft Access', 'Adobe Acrobat', and 'Apple iPad 3'. The bottom of the screen shows navigation buttons and a footer with 'Activate' and 'Deactivate' buttons.

Milestone-5: Reports

Purpose

To analyze and visualize cafeteria menu data.

Uses

Helps track menu trends. Provides insights through grouped data. Supports decision-making and planning

Configuration

Report Name: Cafeteria Report

Type: List

Table: Cafeteria Menu

Group By: Menu Date

Columns

Menu Date

Menu Items

Menu Name

The screenshot shows the ServiceNow interface with the following details:

- Left Sidebar:** Shows the navigation bar with "FAVORITES" and "ALL". Under "ALL", the "Reports" section is expanded, showing "Getting Started", "View / Run", "Create New", "Scheduled Reports", "Import Tables", and "Header Footer Templates". The "Create New" button is highlighted with a red box.
- Top Bar:** Includes "Favorites", "History", "Workspaces", "Admin", "ServiceNow", "Search", and user profile icons.
- Main Content:** The title "Create a report" is displayed. A breadcrumb navigation shows "Data > Type > Configure > Style".
 - Report Title:** A field labeled "Report Title:" is present.
 - Report Name:** A field labeled "Report name:" is present.
 - Source type:** A dropdown menu labeled "Source type" is set to "Table".
 - Table:** A dropdown menu labeled "Table" shows "No table selected".
- Right Side Panel:** Contains promotional text:
 - "Create your report with Analytics Q&A"
 - "Ask for information. You can give simple filtering conditions."
 - "You get the answer with an appropriate visualization."A "What do you want to see?" input field and an "Ask" button are also present.

Milestone-6: UI Action

Purpose

To provide a quick action button to publish cafeteria menus.

Uses

Automates status updates. Reduces manual effort. Improves workflow efficiency

Details

Name: Mark as Published

Condition: Status ≠ Published

Script

```
current.status = 'Published';
current.update();
gs.addInfoMessage("Menu has been marked as Published");
action.setRedirectURL(current);
```

The screenshot shows the ServiceNow UI Actions list page. A search bar at the top contains the text 'ui act'. A red box highlights the search bar and the 'Now' button on the right. The main table lists various UI actions, including 'Accept', 'Accept All Changes', 'Accept Changes', 'Accept remote update', and 'Accept remote'. One specific action, 'Mark as Published', is highlighted with a red box. It has the following details:

Name	Table	Comments	Form action	UI action	Active	Order	Condition	Updated
Abandon	Interaction(Interaction)	Close/Abandon the current interaction.	false	false	true	200	current.state == "on_hold" current.state == "closed"	2022-08-29 06:10:02
Accept	[sys_bim_client_recommendation_activity]		true	false	true	100	current.state != "implemented"	2024-06-18 03:47:03
Accept	Index Suggestion [sys_index_suggestion]		true	false	true	100	current.state == "drop_suggested_unused"	2024-06-18 03:47:03
Accept	Social Q&A Answer [kb_social_qa_answer]	To accept the answer for a question	true	true	true	100	current.accepted == true && new SocialQAnswer.state == "published"	2024-06-18 03:47:03
Accept	Knowledge Feedback Task [kb_feedback_task]		true	false	true	100	current.state == 6 && current.opened_by == null	2024-06-18 03:47:06
Accept All Changes	Zing to AI Refresh Migration Job [sr_zing_refresh_migration_job]		true	false	true	100	gs.hasRole('sys_admin') && current.state == 1	2022-03-09 11:46:01
Accept Changes	All Search Migration Staging Record [sr_search_global_job_staging]		true	true	true	100	gs.hasRole('sys_admin') && current.state == 1	2023-04-10 08:57:54
Accept remote update	Update Set Preview Problem [sys_update_preview_problem]		false	true	true	200	current.state == 0 && current.available == true	2024-06-18 03:47:04
Accept remote	Preview Problem XML Status [kb_preview_xml_status]		false	true	true	100	current.problem.state == 0 && current.problem.state == 1	2024-06-18 03:47:07

The screenshot shows the ServiceNow Create Application dialog for a 'Mark as Published' action. The configuration steps are outlined as follows:

- Action Name:** Mark as Published (highlighted with a red box).
- Action Type:** Call a Java Method (highlighted with a red box).
- Action Script:** The script is defined in the 'Script' field:

```
current.state = 'Published';
gs.addInfoMessage("The menu has been marked as Published.");
action.setRedirectURL(current);
```
- Condition:** Current state is Published (highlighted with a red box).

Milestone-7: Testing

Purpose

To verify that all functionalities of the system work correctly.

Uses

Ensures system reliability. Identifies and fixes errors. Validates user workflows

Testing Service Catalog

Open Service Catalog

Click Try It

Enter menu details

Click Order Now

Testing UI Action

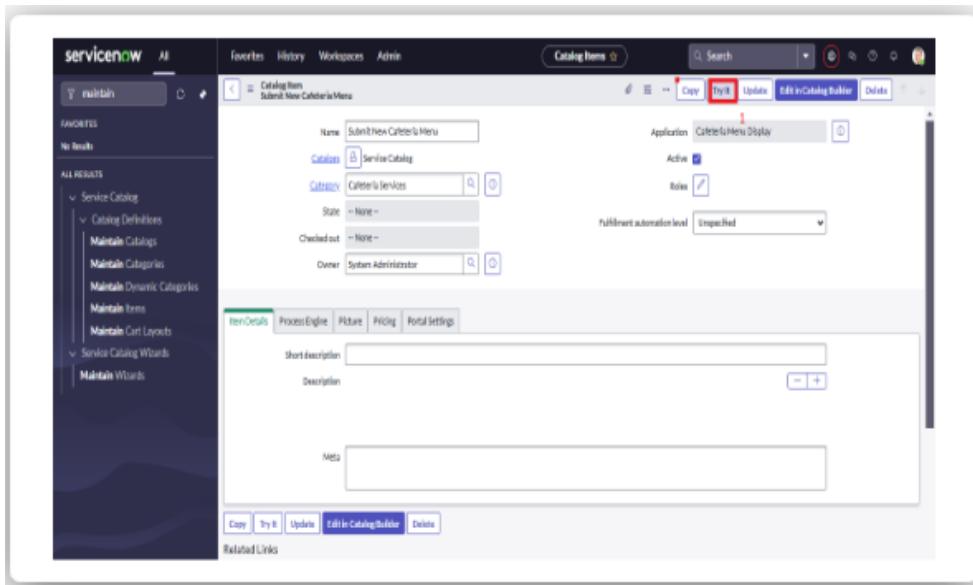

Open Cafeteria Menu Table

Click New

Enter details

Click Mark as Published

Status should change to Published

The screenshots illustrate the ServiceNow Cafeteria Menu Display Portal. The top screenshot shows the 'Submit New Cafeteria Menu' page, where a user has selected an Italian menu item named 'pizza'. The bottom screenshot shows the 'Order Status' page, indicating that the request has been submitted successfully with order number RFO0010005.

Conclusion

The Cafeteria Menu Display Portal provides a comprehensive solution for managing, publishing, and optimizing cafeteria menus with ease and efficiency. By leveraging automation and real-time updates, the platform ensures accurate meal scheduling, reduces administrative workload, and enhances employee engagement. Automated workflows for menu approval, publication, and reporting enable organizations to streamline cafeteria operations, minimize errors, and improve the dining experience. This project showcases the power of ServiceNow's capabilities in integrating menu management, automation, and reporting tools to create a seamless food service system. By enhancing menu accessibility and operational efficiency, the platform helps organizations improve meal planning, reduce waste, and boost overall satisfaction.
